**When you make your living driving a truck you know what truly matters
That's a comfortable seat.**

From the basic frame and suspension to the selection of fabric, we understand that each feature impacts your comfort. That's why we're so excited to introduce the Bostrom Pro Ride, loaded with enhancements to increase comfort, durability and style.

Improved comfort, durability, serviceability and style

To ensure the highest level of comfort, we reworked the chemical make-up of the foam, it's contours and it's thickness. After much testing, including body pressure mapping and actual consumer comfort evaluations, we think you'll agree that the ProRide exceeds all expectations. But we didn't stop there - we went one step further. We redesigned the Flex Support System to create superior energy absorption and improved support. So when it comes down to it, those bumps in the road won't feel quite so bad. And for easy adjustments, we mounted a new switch in a profiled side shield. This, along with custom stitching, fabric, and functional options, ensure you'll have all the comfort and convenience you want with the added style you deserve.
